[African Leadership Program (ALX)] Bachelor's in Software Engineering | Expected Graduation: [03/24]

[University Of Eldoret] Bachelor's in Information Technology | Expected Graduation: [09/26]

Experience:**Languages:**

Fluent in English

Why Microsoft:

I am drawn to Microsoft's mission of empowering every individual and organization globally to achieve more. Microsoft's emphasis on excellence and its status as a company of "learn-it-all" rather than "know-it-all" strongly appeal to me. The opportunity to work on cutting-edge technologies and contribute to solutions that have a global impact is exactly what I am seeking in an internship. I am excited about the prospect of being part of a company that values community, inclusion, and individual growth.

How I Fit:

My technical expertise, paired with a growth mindset, makes me well-suited for the Software Engineering Intern role at Microsoft. I am confident in my ability to quickly adapt to new engineering methods, incorporate best practices, and apply creative solutions to complex problems. My dedication to quality, strong problem-solving skills, and experience in backend containerized microservices align with the qualifications outlined for the role.

Closing:

Enthusiastic about the opportunity to join Microsoft, contribute to cutting-edge technology, and grow both personally and professionally. I look forward to the chance to discuss how my skills and passion align with Microsoft's vision during an interview.
